Learning from Learners: Pupil Survey for Prep and Primary Schools

Grange Primary Academy 2023 Pupils Primary

Introduction

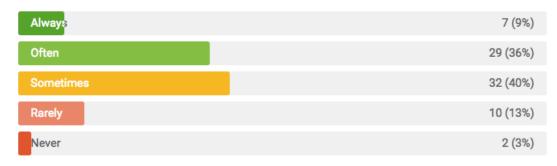

Response averages

The group and school average view is useful to quickly get an overview of the survey results. However, to have a complete understanding of the survey results, it is necessary to review the more detailed bar graphs for each question. The average responses do not show whether student responses are grouped around one value or spread out.

In calculating the group and school averages, each possible response is given a value from 1 to N (number of available responses), where 1 is the lowest-ranked answer (e.g. "not at all" or "not useful at all") and N is the highest-ranked one (e.g. "very often" or "very useful"). The average response is the mean of all the responses to a question (in a selected group or in the school).

For these purposes, a group can be a selected class, subject, or teacher for which the average response is calculated.

How often do you find these lessons interesting?

Result colours

Bar graphs and line graphs are shown on a colour scale from red to dark green. The same scale is used with numeric results, where the colour represents the response closest to the result.

Graphs that do not represent a scale are shown in purple.

Differences in respondent count

For each question we have added the amount of respondents; how many students, parents or teachers have responded to a question. It is not possible to skip a question, but it might be that a respondent has paused their survey and has not responded to all of the questions.

Positive responses

The percentage of positive responses is calculated by determining the proportion of the responses that belong to the top half of the possible responses, excluding the middle response when the number of possible responses is odd.

Filtered average

This is the average of the filtered subset of results, based on the selection made when downloading the PDF – as indicated on the cover page of this document.

Grange Primary Academy

To help us and tell us ideas and help us to learn a very very lot so we no what to do because some people will not no so people will need a lot and a lot of help or their partner can or so can help them a lot and a lot.

The teachers in the classroom are there to help me. I have a first and next board so I know what I'm xpected to do.

They let us take our time and if we don't understand the teachers will demonstrate until we do understand.

Does lots of demonstrations and when we learn new things thy teach us in little parts

If I don't know a word miss brown and miss Craig can write it on my white board

I put my hand up and then a teacher comes over ands mrs Robinson helps me and miss Griffin helps and miss saywood helps me do my work

They focus on our weak points in lessons and help us improve them, increasing our understanding in that subject.

When we write our stories we always plan it and also on maths our teacher always demonstrates it

They make sure our learning is fun and that we always our proud in whatever we do!

The teachers explain things clearly so I can understand everything I
